But it's just one of many ways in which the food industry seems to be able to show that it does not have to worry about the welfare of the animals that are used to produce cheap food for us. From the factory farm, we get cheap meat, while the animal is in a miserable environment and subject to pain and distress during transport and slaughter. The Government does not seem to have a comprehensive food safety policy. (See: Adam Ganley in the Independent 10 May 2011) Sep 22, 2019 Mount Etna, just a few kilometers from Catania, erupted yesterday, sending a huge column of ash 9 km high . Another explosion occurred near Mount Vesuvius early this morning, the first since 2010, and these happened again in mid-afternoon, but did not cause any major damage. This is a natural event, similar to a local eruption of Mount Washington. Scalabatic revenues, on the other hand, are financed by a sovereign (or paper) currency which is fully backed by the government. A good example is the Federal Reserve (FED) in the USA. The only liabilities (keep in mind that this is a hypothetical exercise) for the US Government (in its full blown form) are the following: Federal Debt, Treasury Debt, Commercial Paper and other loans. On the other hand, the US Government has the following assets: Fed Funds, Treasury Securities, Corporate Debt and Agency Securities. Oct 16, 2019 On September 9, 2010, the Reserve Bank of India introduced its first short-term loan in the market, a scheme aimed at promoting liquidity in the financial system in times of need. Called Import Credit Receipt Account (ICRA), the scheme is a product of the collective efforts of the Central and state governments, and international agencies. It was introduced on a pilot basis in nine banks: State Bank of India, Bank of Maharashtra, Bank of Bengaluru, Dena Bank, State Bank of Saurashtra, State Bank of Mysore, State Bank of Travancore, Syndicate Bank, and Union Bank
